

Connect Version 7.4 Patch Release Notes

Connect 7.4 supports the following iMIS versions:

Minimum Version	Maximum Version
20.1.1.4	20.2.64.9193

Connect support for iMIS 2017 through version 20.2.64.9193

New Features

Credit card gateway reference number populates Trans. GATEWAY_REF field.

Designed to provide more information for reconciling credit card transactions reports available from gateway. The gateway reference number will be included on batch reports as well.

Transaction	Date	Bill To/ Ship To
404697	10/23/2018	308716 John Q. Doe
MEETING	Income	GATEWAY_A- Networking Reception GATEWAY_A- Awards Luncheon GATEWAY_A- Main Registration GATEWAY_A- General Session Workbook Check: E_AMEX *****8431 Gateway Ref: A73AAB289030

Resolved Issues

Complimentary registrations will not send SQL timeout message until final attempt.

A few clients experienced a SQL timeout message on the first attempt to insert a complimentary registration when attempting to secure an invoice number. The registration would insert on a subsequent attempt. Connect is programmed to make more than one attempt. This patch will prevent an error message before the final attempt.

How to Receive the Update
